- Zero Emission Buses Greater Sydney Tranche 1 Final Business Case

Value

- Confidential

Solution Required

- Project Controls Environment Enhancement

Services Provided

- Project Controls Management
- Tender Management

Audacian Pty Ltd were engaged directly by Transport for New South Wales to provide Project Controls (Cost, Risk, and Schedule) Management for the Zero Emission Buses Greater Sydney Tranche 1 Final Business Case.

Audacian were embedded in the organisation as the Project Controls Lead for the preparation of the Final Business Case.

Approach

Audacian had previously provided Project Controls Management Services to Transport for New South Wales, and the Team working on the preparation of the Final Business Case and leveraged this knowledge and experience to ensure that the Project Controls aspects of the Business Case were professionally implemented.

Activities undertaken included:

- Preparation of the Client Costs required for the execution of the Project including liaising with the required Stake Holders
- Participation in the Tender Assessment Process for the Business Case Writer / Estimation Team
- Participation in the Tender Assessment Process for the Independent Estimator
- Working with the Cost Estimation Team to assess and review the FBC Estimate, including providing feedback and recommendations
- Managing the assessment of the identified Risks to ensure that the Likelihood and impact ranges were determined and agreed as well as facilitating the Risk Workshops for the QRA and SRA
- Reviewing the Business Case Chapters as well as the Cost and Peer Review Reports
